LAB02: Installatie & Configuratie AZURE AD CONNECT

Alex ter Neuzen

GetToThe.Cloud

Inhoudsopgave

Inleiding	2
Toevoegen External Domain Azure	3
Installatie Azure AD Connect	4
Configuratie van Azure AD Connect	8
Controle synchronisatie	13

Inleiding

Om gebruikers een identiteit te geven in AzureAD zodat hiermee gebruik gemaakt kan worden de Microsoft 365 Suite, is door Microsoft de applicatie AzureADConnect beschikbaar gesteld. Deze applicatie zorgt dat gebruikers en groepen die in de OnPremises Active Directory bestaan, gekoppeld en gemaakt kunnen worden in Azure AD. Hiervoor wordt een unieke waarde op het Active Directory account geschreven zodat door de service deze gelinked aan elkaar kunnen worden.

Binnen AzureAD is vervolgens de mogelijkheid om licenties toe te kennen aan deze gebruikers voor de verschillende services die binnen Microsoft 365 Suite geboden wordt.

Toevoegen External Domain Azure

Om ADConnect goed te laten werken moet eerst het domein dat voor de mail migratie gebruikt gaat worden, worden toegevoegd aan AzureAD.

In Azure Active Directory -> Custom Domain Names kan dit domein worden toegevoegd. Volg de stappen die worden aangegeven.

Installatie Azure AD Connect

AzureADConnect kan worden gedownload bij Microsoft op de website: <u>Download Microsoft Azure Active</u> <u>Directory Connect from Official Microsoft Download Center</u>

Hier staat altijd de laatste versie.

In het deployment script is dit al gedaan. De locatie van de MSI is op de Exchange Server C:\ExchangeDownload\AzureADConnect.msi

1 Dubbelklik op de AzureADConnect.msi

🔷 Microsoft Azure Active	Directory Connect _ X
Welcome	Welcome to Azure AD Connect
Express Settings	Run this installation tool on the server where the synchronization service component will be installed.
	Azure Active Directory Connect integrates your on-premises and online directories.
	This installation tool will: • Guide you in selecting a solution (for example, password hash synchronization or federation with AD FS)
	 Install identity synchronization and other Microsoft software components required for deployment Enable application telemetry and component health data by default. You can change what data is shared with Microsoft by updating your privacy settings.
	Learn more about hybrid identity
	☑ I agree to the license terms and privacy notice.
	Continue

2 Selecteer I Agree to the license terms and privacy notice en click Continue

Controle synchronisatie

Via de Azure Ad Connect Synchronization Service Manager is te controleren of de synchronisatie met Azure AD goed is gegaan. Het is de bedoeling dat er 49 identiteiten worden toegevoegd en 6 worden geupdate.
